Refrigeration System

By matching and balancing compressors, evaporators and condenser coils, True engineers environmentally friendly refrigeration systems that provide users with shorter run times, lower energy consumption and the industry's coldest holding temperatures.

True's coated evaporator coils have 20-40% more surface area than the industry standard, resulting in faster pull down of product temperatures and quicker recovery times.

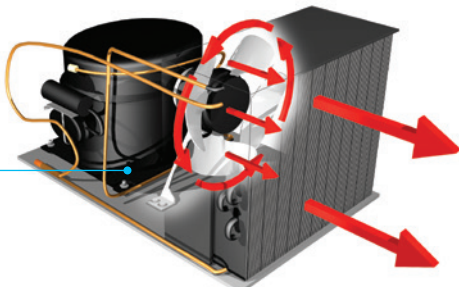

By utilizing the largest condensers in the industry, with more standard passes, True units will ensure better food preservation.

RCU Technology

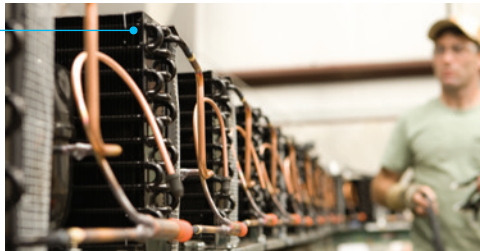

Reverse Condensing Fan Motor Technology (RCU) allows for the reversal of the condensing fan motor, helping to keep the condensing coil clean and reduce the negative effects of a dirty coil. A clean condensing coil can help reduce energy consumption by as much as 20%.

Ecomate® Foam

True continues its commitment to sustainability by pioneering the use of Ecomate, a foamed in place, CFC-free, high-density polyurethane insulation. Ecomate provides unparalleled strength, rigidity, and an increase to an already industry-exceeding insulation factor, with zero ozone depletion potential (ODP) and zero global warming potential (GWP).

ecomate®
BY FOAM SUPPLIES, INC.

Energy Efficient Glass

All True glass door units utilize the best available technology for energy efficiency. For medium temperature applications (refrigerators), True uses double pane "Low-E" glass assemblies, providing greater insulation values, resulting in decreased compressor run time and reduced energy costs.

100% Run Testing

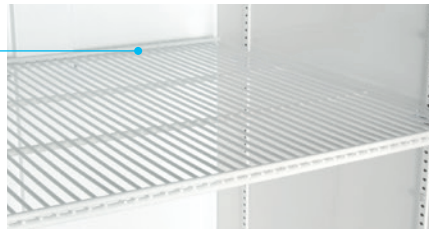

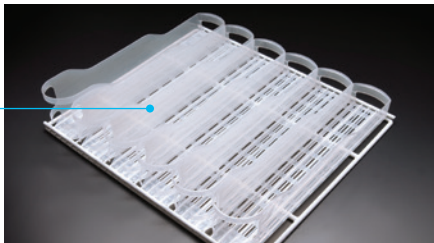

True run tests every single model that is manufactured as a part of the final quality inspection before releasing the unit into finished goods inventory. Every refrigerator is run tested for 4-6 hours.

Shelving

True manufactures its own heavy-duty wire shelves, utilizing larger diameter steel for strength. Shelving is bonded with powdered PVC to prevent chipping and peeling which is prevalent in standard epoxy coated shelves.

Gravity Feed Organizers

Easy to install and load, TrueFlex Gravity Feed Organizers maximize cooler pack-out. A new silicon "slip" agent improves slide performance. The open track design does not restrict air flow or inhibit cabinet pull down and single glides snap on to our wire shelves; no tie downs! Solid side walls, dual front bars and back bar ensure product stability. Just three sizes fit over 30 models.

Warranty

True's exclusive 5-year compressor/condensing unit warranty is the envy of the industry. At no additional cost, our customers enjoy the option of having the entire condensing unit replaced. This consists of a new compressor, condenser, start components, and fan motor, all of which are pre-assembled and shipped from the factory. True also includes a 3-year parts and labor warranty and has an extensive parts inventory ready for immediate shipment.

Availability

True builds for inventory, which allows for a near 100% fill rate on standard items within a 2-3 day turn around from the time the purchase order is received and processed.

Energy Star®

True is committed to eco-friendly manufacturing by meeting and surpassing energy standards, without sacrificing performance. By using higher capacity, balanced refrigeration systems, True's run time exceeds industry energy efficiency expectations.

Made in the USA

True has manufactured its products in the United States for over 70 years, using an industry leading combination of high quality materials and components designed to optimize cabinet performance and durability.

Customer Service

True employs an extensive group of regional factory salespeople and international salespeople. Our dedicated sales staff is your premiere source for educated sales and design assistance.

TrueFlex[®] Gravity Feed Organizers

*Based on 20 oz. Bottles

BENEFITS

- Double front bars and high side walls prevent bottles from tipping. Back bar prevents bottles from leaning against back wall of cooler.
- Single glides offer flexibility to display multiple packages on the same shelf.
- Easy to install. TrueFlex glides snap on to standard wire shelves, making it possible to retrofit older coolers equipped with flat shelves.
- Includes shelf retainer clips that keep shelves from sliding into door. Eliminates zip ties and service calls.
- Enhanced silicon "slip" agent improves gravity feed performance.
- Optimum air flow ensures rapid pull down to serving temperature.
- Can be ordered with the cooler and shipped inside the unit for one stop shopping (pictured).

True stripe signs are standard on all GDM models.

Plain White, Plain Black, and Stainless Steel signs are available upon request on most models.

Alternative signs are available at no charge if indicated at the time the order is placed and shipped from the factory.

If a sign is ordered after the unit leaves the factory, an upcharge will apply.

Custom signs and graphics are available. Please contact the factory for details and pricing.
