

TFP / TSSU - WITH GLASS TOP

True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, lower utility costs, exceptional food safety and the best value in today's foodservice marketplace.

Another addition to True's food preparation table line is the TFP and TSSU with Glass Top. This line of Mega-Tops is made with quality metals such as a stainless steel front, top and sides with an aluminum back. TFP and TSSUs with Glass Tops come standard with a 5 3/8" (137 mm) deep full length removable cutting board made of sanitary, high-density, NSF approved white polyethylene. The countertop pan opening is designed to fit varying size pan configurations with available pan divider bars. The new Glass Top doubles as an insulating top and as a sneeze guard. By lifting the lid, you convert the glass lid to a sneeze guard allowing customers to view their choice of fresh ingredients. The doors and drawers to the storage area below come equipped with 12 inch recessed door handles. True's forced air design moves air below the food pans to keep the product temperature between 33°F to 41°F (0.5°C to 5°C).
